Healing the Whole Person: Addressing the Social Determinants of Health Benefits Patients and Providers Alike

Paul B. Roth, M.D., M.S.
Chancellor, UNM Health Sciences Center
Dean, UNM School of Medicine
Social Determinants of Health

The conditions in which people live and work, and that affect their opportunities to lead healthy lives.

“Your ZIP code is more important than your genetic code”
Determinants of Health Disparity

Relative contributions:

30% genetics

25% clinical care

45% social, behavioral and environmental factors
New Mexico At A Glance . . .

Area: 121,697 square miles
Median household income: $44,866
High school graduate or higher: 83.4%
Below poverty level: 19.5%
UNM Health Sciences Center

Our commitment . . .

We will measure our success not by our *individual* accomplishments, but by the health improvements of the people of New Mexico
