X. Mention some of the important projects, assignments completed by you during your tenure:

Various review article publications (see attached CV).  
 Bulletin board article reorganization.  
 Center's website updating and reformatting.  
 Secretarial work.

XI. Provide your suggestions to further improve the training program:

Considering my background in biochemistry and molecular biology, I would like to have been involved in experimental bench work as well. I had a clear grasp on the techniques used in the center, so it would have been beneficial to the both of us. Even something as simple as calibrating the pipettes or making buffers would have been fun. I also think that attending the animal surgeries, observing the andrology sperm bank work, and attending human surgeries should be more emphasized and accessible to students in the program. Of course, money was also an issue, so the establishment of a summer intern fund for college-aged students would be appropriate. The SIP program students luckily have funding through their program, but most of the time can not actually do much because of their lack in scientific background. It seems to be appropriate to offer a stipend to older students with a strong scientific background.
