2012 Summer Internship – Cleveland Clinic

Dear Dr. Sabanegh,

I would like to take a moment to express my sincere appreciation for the invitation to join you this summer at the 2012 Summer Internship Program. This program truly demonstrates not only a rewarding learning experience for the students but also reveals knowledge of how to efficiently and effectively execute a successful summer internship by Dr. Ashok Agarwal and the entire team.

This multi-faceted program surpasses those of its kind, as students are able to benefit from an all-encompassing experience emphasizing education through theory and in practice as well. It was very evident, under the tutelage of the Research Team, that the interns were able to grow exponentially from the start of the program to their final presentations. The unique teaching staff encompassed a strong collaboration of an international, well renowned group of professors and lecturers that gave the students insights from various teachings and expertise. It was a pleasure to see the amount of support given to the interns through this intense summer program and the environment of success that was created for them.

It truly was an honor for me to receive an invitation to be a part of this Summer Internship Program. This was my 4th trip to Cleveland as a guest faculty and I thoroughly enjoyed every minute of my stay there. I am amazed at the amount of preparation and efforts that go into this summer internship and the dedication of your team to provide the highest quality educational experience. What is most impressive is that this internship keeps on getting better and better year after year through its laser like focus on continuous improvement. I strongly support and trust the efforts of Dr. Agarwal and his entire team at the Cleveland Clinic and look forward to supporting this program in the future.

Sincerely,

Zsolt Peter NAGY M.D., Ph.D., HCLD
