Pasqualotto, Eleonora, A81

FROM: Office of the Institutional Review Board, Wb2

IRB 2988 "Predicting Fertilization in an IVF Program by the use of
Mannose Receptor Assay
"

On May 28, 1999 the Institutional Review Board (IRB) fully approved the above-referenced research project for the period of May 28, 1999 through May 27, 2000. The Board has approved the protocol and the revised consent documents (1 of 2) and (2 of 2). Attached please find the copies of your consent documents with the IRB-stamped approval date. PLEASE USE THESE COPIES ONLY.

Research Investigators are responsible for reporting promptly to the IRB proposed changes in research activity or any unanticipated problems which involve risks to the human research subjects or others.

Good luck with your project, and remember, you must submit a progress report after one year. An annual progress report for the renewal or a final report of completion is due at least 30 days prior to the expiration date of May 27, 2000.

Sincerely,

A handwritten signature in blue ink, reading "Alan E. Lichtin, M.D.", with a circled "ff" to the right.

Alan E. Lichtin, M.D.

Chairman, Institutional Review B
