RE: 06-423: Long term effects of electromagnetic waves on human semen (Investigator Initiated)

Dear Mr. Deepinder:

Your response dated 8/9/2006 to requests from a prior review of your application was reviewed and approved at the 8/25/2006, convened meeting of the IRB.

You are granted permission to conduct your study with the Application (dated April 18, 2006) includes the Clinical Study Protocol (not dated), the Informed Consent Document (dated April 2, 2006), the correspondence from Biostatistics (dated May 11, 2006) and the Questionnaire ("Reproductive Research Center" not dated)

Attached are the approved revised consent and questionnaire with the IRB stamp authorizing use for the period 8/25/06 to 8/24/07. Subjects must be given a signed and dated copy of the consent prior to their participation.

The approval period for this study **will expire** on 8/24/2007. You are required by federal regulations and IRB policy to submit a continuing renewal report or completion report 30 days prior to the expiration date and ensure that no research activities will continue beyond the expiration date.

Please note that any changes to the study as approved must be promptly reported and approved by the IRB prior to implementation. Any study deviations and unanticipated problems, including adverse events that are unexpected and related or possibly related to the research intervention must be promptly reported to the IRB. Please refer to IRB Policies #60 and #70 regarding specific reporting timeframes.

Sincerely,

Daniel Beyer, M.S., MHA, CIP
Executive Director, Institutional Review Board
